Kruize D. Christensen

Fairfield, MT | (406) 799-8121 | christensen.kruize@gmail.com | kruizechristensen.com

Objective

I aim to make work easier and more efficient by teaching others how to use tools effectively, automating repetitive tasks, and streamlining workflows. At the same time, I strive to reintroduce creativity and color into modern design, ensuring that technology and user experiences are not only functional but also engaging and unique.

Experience

Montana Silversmiths – System Administrator

Sep 2024 – Present | Columbus, MT

- Manage and optimize IT infrastructure, servers, and Microsoft Dynamics AX environments, supporting authentication and B2B/EDI integrations.
- Lead cybersecurity initiatives including firewalls, endpoint protection, and email security to safeguard company data and reduce risk.
- Oversee domain and DNS management across internal systems and external-facing platforms.
- Design and deploy low-cost Raspberry Pi devices to display real-time Power BI dashboards, improving production visibility across teams.
- Manage hardware lifecycle, onboarding/offboarding, and coordinate system deployments and go-live transitions with cross-functional teams and vendors.

Mountain Wizard – Founder

Jun 2024 – Present | Fairfield, MT

- Oversee branding, web design, and digital strategy to grow community presence.
- Built and maintained IT infrastructure supporting business operations.
- Design, test, and launch products for online sale.

Taylor Luther Group – IT Support

Apr 2024 – Sep 2024 | Helena, MT

- Provided IT support and hardware troubleshooting across client sites, including website design, hosting, and maintenance.
- Supported property and facility management operations, coordinating maintenance and vendor needs.
- Delivered hands-on technical and organizational support across diverse projects, including ranch and hunting club operations.

Health Care Service Corporation – Associate Developer

Oct 2023 – Apr 2024 | Helena, MT

- Supported and modernized legacy mainframe systems within the health insurance sector.
- Operated proprietary systems to process insurance claims with a focus on accuracy and compliance.
- Collaborated with offshore teams to evaluate tools like VS Code and GitHub for legacy workflow modernization.
